PROFESSIONAL SUMMARY

Data Science undergraduate at the Indian Institute of Technology Madras with hands-on experience in SQL, Advanced Microsoft Excel, Power BI, and Python for data analysis, MIS reporting, dashboard development, and KPI tracking. Experienced in cleaning, validating, and analyzing business datasets to develop interactive dashboards and reporting solutions that support data-driven decision making. Strong analytical and problem-solving skills demonstrated through retail and sports analytics projects.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Analytics & Reporting: Advanced Microsoft Excel, Power BI

Excel Skills: Pivot Tables, VLOOKUP, XLOOKUP, SUMIFS, Conditional Formatting, Reporting Dashboards

Libraries: Pandas, NumPy, Matplotlib

Databases: MySQL, SQLite

Core Competencies: MIS Reporting, Dashboard Development, KPI Reporting, Reporting Automation, Data Cleaning, Data Validation, Business Analysis, Data Visualization, Exploratory Data Analysis (EDA)

EDUCATION

Indian Institute of Technology Madras

Chennai, India

Bachelor of Science in Data Science and Applications | CGPA: 8.0/10 *Expected Graduation: December 2027*

PROJECTS

Executive Sales Performance Dashboard

Advanced Microsoft Excel

- Developed an Executive Sales Performance Dashboard using Advanced Microsoft Excel to analyze ₹61.58M revenue across 12,000 customer orders.
- Automated KPI reporting using Pivot Tables, VLOOKUP, SUMIFS and dynamic reporting techniques to improve business reporting efficiency.
- Analyzed sales, profitability, customer segments and regional performance to generate actionable business insights through interactive visualizations.

IPL Cricket Analytics Dashboard

Python, SQL, Power BI

- Processed and analyzed 50K+ IPL ball-by-ball records using Python and SQL for data cleaning, validation and exploratory analysis.
- Designed interactive Power BI dashboards to monitor team performance, player statistics, venue analysis and season-wise KPIs.
- Identified scoring trends across IPL seasons to support performance comparison through data visualization and reporting.

U.S. Superstore Business Intelligence Dashboard

SQL, Power BI

- Cleaned, transformed and analyzed \$2.26M retail sales dataset using SQL and Power BI.
- Built interactive dashboards for customer segments, regional sales, product categories and business performance monitoring.
- Generated business insights through trend analysis and KPI reporting to support data-driven decision making.

CERTIFICATIONS

- HackerRank SQL (5 Star)
- Deloitte Australia Data Analytics Job Simulation (Forage)
- Power BI for Beginners – Simplilearn

ACHIEVEMENTS : Earned HackerRank 5★ SQL certification
